July 31, 1959

Mr. Lee Strong
Beaver, Utah

Dear Mr. Strong:

Reference is made to my letter of June 5, 1959 and to the table set out therein concerning distribution of certain rights on the Beaver River. By the way of elaboration and clarification, the following additional directions are now issued:

1. For the purpose of applying the table, the total diversion for the eight rights are totaled.
2. Column 3 is concerned with the allocation of the first 45.63 cfs, before June 1 of each year.
3. After June 1 of each year, when the total divertable flow exceeds 76.63 cfs., it shall be prorated to the eight canals in accordance with the percentages set up in column 4.
4. After June 1 of each year if this total flow is less than 76.63 cfs, the first 4.5 cfs shall be allocated to the parties in the amounts as set up in column 5. The remainder of this flow in the river shall be prorated to the eight canals in accordance with the percentages set up in column 4.

We trust that there should now be no question as to our determination of this matter.

Yours very truly

Donald C. Norseth
Distribution Engineer
